

UP 10 Ecoline, UP 115

The UNIFLEX marking tool UP 10 Ecoline has a compact table construction. The European safety regulations DIN20066-2012-10, EN853, 854, 856, 857 stipulate that hose lines have to be marked indelibly with the manufacturer code, the assembling date and the max. pressure, e.g: XX_YY/MM_330 bar. This embossing will also allow you to control who produced the hose line and when. This is helpful information in the case of warranty claim.

The new and compact UNIFLEX marking tool UP 10 Ecoline will give you an exact and easy-to-handle tool. The robust technology and lowmaintenance makes it a perfect machine for mobile operations or workshops.

UP 10 Ecoline

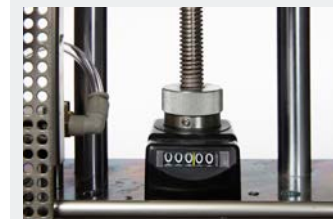

Compact Design
Compact for mobile usage, standard with a 1-row marking tool
